

770 Electronic Lock

New!

Enhance the security and elegance of your hotel with the ultimate guest room lock - engineered for reliability and designed for style.

Maximize guest security and comfort
Guests will appreciate the deadbolt protection, ergonomic design and easy-to-use card reading of the 770 Electronic Lock.

Complement your hotel's unique style
Sleek lines and a selection of contemporary finishes enhance the décor of your property.

Increase operational efficiency
Easy to install and maintain, the 770 Electronic Lock simplifies access control for hotel staff, saving you time and money!

Comprehensive security and tracking

Programming options allow for limited access to staff and guests in restricted areas or during specified times. Each lock keeps an audit trail of the last 200 transactions. A standard mechanical key override gives hotel management and security staff peace of mind.

Worry-free maintenance

All electronics and batteries are located in the front housing, so there is no need to disturb guests for maintenance. Software upgrades can be implemented on site, eliminating delays.

Functions

- Operates with reliable easy-to-use magnetic stripe keycards
- Reads magnetic stripe when keycard is removed, ensuring that cards are not left in the lock
- Provides visible and audible feedback; LEDs are mounted directly in the reader
- Automatically cancels previous guest's keycard to ensure privacy and security

Features

- One-inch solid metal deadbolt for added protection and privacy (available with auto-deadbolt)
- Audit trail records the last 200 lock transactions
- Standard mechanical key override
- Lock can be integrated into a master key system
- Control boards are coated with a proprietary solution to seal out moisture and contaminants

Compliance and certification

- ADA-compliant for physically disabled guests and staff
- Shabbat-compliant lock available
- ILCO's 770 Electronic Lock is listed in the BHMA Certified Products Directory for ANSI/BHMA A156.25 and A156.13 2002 Electrified Locking Devices Grade 1

Finish Options

Decorative as well as durable, these finishes are designed not only to complement but also to enhance any hotel décor.

Supreme and Powder Coat Finishes

More durable than a physical vapor deposition finish, these exclusive supreme and powder coat finishes resist severe acid-salt spray, making them ideal for properties with demanding environmental conditions such as ocean-front exposure, high pollution and harsh winters.

Lever Options

The 770 Electronic Lock is available with a standard long lever or standard short lever.

****Warning: Chrome polisher should not be used with this finish**
