

InSync[™] D

SAFLOK[™] has designed and manufactured powerful solutions that help building managers achieve increased access management flexibility, security, and efficiency in their daily operations. SAFLOK products are the trusted name in multifamily communities, student housing and campuses, commercial buildings, as well as transient and long-term military housing.

The InSync[™] series is the latest lock line. The series features a complete range of versatile locks that communicate by means of a wireless RFID (radio frequency identification) platform. The front desk operating system for the locks is the Windows-based SAM[™] RF software. This software programs information, such as access codes, onto the RFID key.

The InSync D lock includes a robust sectional trim, fully enforced by a 1" saw-proof dead bolt.

Security Access Manager

InSync D can be provided in two different configurations in order to accommodate various applications.

InSync D Unit Locks

The unit configuration provides operational functionality for individual entry doors. Rotation of the inside thumb-turn or the inserted RFID key extends or retracts the 1" dead bolt locking or unlocking the door. In the locked position only duplicate resident and authorized service keys can access the lock. Unit locks are programmed with one resident code (change key). Each key made with one resident code can have up to 64 unique identity codes.

InSync D Suite Locks

The suite configuration was designed to allow access to multiple residents who have the need to access individual unit doors behind the suite door. D suite locks require the resident to throw the dead bolt using the thumb-turn or by rotating the RF key in the lock after ingress or egress to relock the door. Suite locks can recognize up to 20 resident codes.

Note: Handle set shown in front picture is not included

InSync D Specifications

- 1" dead bolt
- 2-3/8" (60 mm) or 2-3/4" (70 mm) backset
- Interior thumb-turn
- Standard dead bolt door prep
- Uses 4 AA batteries
- Certified by Underwriters Laboratories (UL) for use on fire doors up to a 20-minute rating

Finishes (* Check for availability.)

Satin Chrome, Satin Brass, Bright Chrome, Bright Brass, *Dark Mahogany, & *Satin Nickel.
